EXPERIENCE

Golden State Warriors

Full Stack Developer & Data Analyst, Basketball Analytics and Innovation — *Oct 2023 - Present*

- Design and build internal web applications for player evaluation and trade analysis
- Spearhead full-stack development from design to deployment using React and TypeScript
- Implement real-time collaboration features (presence, live sync) for multi-user workflows
- Model Postgres database architecture to serve internal apps from existing BigQuery warehouse
- Develop RAG-based AI agent for trade validation, trade discovery, and roster evaluation
- Orchestrate and maintain CI/CD pipelines using GitHub Actions and Vercel

Sports Info Solutions

Senior Basketball Research Analyst — *Oct 2023 - Oct 2023*

- Continued prior responsibilities in addition to managing one Research Analyst

Basketball Research Analyst — *Jan 2022 - Oct 2023*

Basketball Research Associate — *Oct 2021 - Jan 2022*

- Built end-to-end data pipelines from multiple sources to power client-facing APIs
- Added dynamic data ingestion to a previously static client-facing web app
- Created an internal library to reduce duplicate code across department repositories
- Developed multiple internal processes to automate messaging and streamline data integrity

Northwestern University Men's Basketball

Basketball and Sports Performance Analyst — *Aug 2020 - Mar 2021*

- Developed strategic models to provide insights on team performance and upcoming opponents
- Wrote ETL scripts to compile and summarize team advanced on-off lineup and shot location data
- Produced dashboards of biometric data to help optimize team athletic performance during off days

EDUCATION

University of Michigan

Master of Applied Data Science — *Aug 2022 - Dec 2023*

Northwestern University

Bachelor of Arts in Psychology, Minor in Economics — *Sep 2017 - Mar 2021*
